

# HR Interview Questions

## Tell me about yourself

My name is **Prince Monga**, and I'm from **Sirsa, Haryana**. I have completed my **Bachelor of Computer Applications (BCA)** from **Chaudhary Devi Lal University** with a **CGPA of 8.4**.

I have **5 months of hands-on experience** as a **Web Developer Intern** at **Podosphere Technology, Jaipur**, where I worked on front-end development and gained practical exposure to real-world projects.

Currently, I'm pursuing a **Java Full Stack course** from **JSpiders**, where I'm learning technologies such as **Core Java, HTML, CSS, and JavaScript**. I've written **500+ programs** and have a **strong understanding of Core Java concepts**, including **Java introduction, tokens, data types, type casting, control flow statements, and methods**.

I have a strong interest in Java and backend development. I am actively working on secure coding, JDBC, and web technologies, and I aim to grow into a full-stack developer who can build scalable and secure applications.

## 2. What are your short term goals?

My short-term goal is to get an opportunity in a reputed company where I can apply my technical skills in real projects.

## 3. What are your long term goals?

My long-term goal is to become a skilled software engineer, keep improving my knowledge, and grow in a position where I can handle more responsibilities and contribute to the success of the company.

## 4. What are your strengths?

I try to learn things quickly and I work honestly. When I face problems in coding, I don't give up and I keep practicing until I understand it.

## 5. Why should we hire you?

You should hire me because I have a good foundation in Java and web technologies, and I also have basic knowledge of cyber security. This helps me

write safer code, and I am always willing to learn and improve while contributing to your team.

Great 🙌 Prince, since you're preparing as a fresher but already have **strong technical skills + internship experience**, your HR answers should sound **confident but humble**.

Below are the **most important HR questions for Freshers** with **how to answer + sample answers tailored for a tech role (Frontend / Full Stack)**.

---

## ◆ 1. Tell me about yourself

### Structure:

- Education
- Skills
- Internship / Projects
- Career goal

### Sample Answer:

My name is Prince Monga. I'm currently pursuing my Bachelor's degree and have strong skills in JavaScript, React.js, and frontend development.

I have completed internships where I worked on responsive web applications and real-time projects.

I enjoy building user-friendly interfaces and learning new technologies like DevOps and cloud tools.

As a fresher, I am looking for an opportunity where I can apply my technical skills and grow professionally.

---

## ◆ 2. Why do you want to join our company?

**What HR checks:**

- Did you research the company?
- Are you serious or just applying everywhere?

**Smart Answer Structure:**

- Growth
- Learning
- Contribution

I want to join your company because it focuses on innovation and real-world product development. As a fresher, I want to work in an environment where I can learn from experienced professionals and contribute to meaningful projects.

---

## ◆ 3. Why should we hire you?

**What they check:**

- Confidence
- Value

I have strong fundamentals in frontend development and hands-on project experience. I am disciplined, a quick learner, and adaptable. As a fresher, I may not have years of experience, but I bring energy, dedication, and a strong willingness to grow.

---

## ◆ 4. What are your strengths?

Good strengths for tech fresher:

- Problem-solving
- Fast learner
- Clean coding habits
- Team collaboration
- Responsible nature

Example:

My strengths are problem-solving skills, quick adaptability, and writing clean and organized code. I am also consistent and responsible with deadlines.

---

## ◆ 5. What are your weaknesses?

⚠️ Avoid: “I don’t have weaknesses.”

Safe answers:

I sometimes spend extra time perfecting UI design, but I am learning to manage time better and balance quality with deadlines.

OR

Earlier, I hesitated to ask questions, but now I understand that communication improves teamwork and project success.

---

## ◆ 6. Do you prefer working alone or in a team?

Best answer:

I am comfortable in both situations. I can work independently on tasks, but I also enjoy collaborating because teamwork brings better ideas and faster problem-solving.

---

## ◆ 7. Are you ready to relocate?

Yes, I am open to relocation if it helps my professional growth and allows me to work on better opportunities.

---

## ◆ 8. Where do you see yourself in 5 years?

In five years, I see myself as a skilled software engineer contributing to large-scale applications, possibly mentoring juniors and handling responsibility in projects.

---

## ◆ 9. How do you handle pressure?

I prioritize tasks, break work into smaller steps, and focus on one problem at a time. During internships and academics, I managed multiple deadlines effectively.

---

## ◆ 10. Do you have any questions for us?

Always ask something:

- What does the training process look like for freshers?
  - What technologies does the team currently focus on?
  - What does success look like in the first 3 months?
-

# Bonus: Tricky HR Questions for Freshers

👉 What if we assign you a task outside your skill set?

I would first try to understand the requirement, research the topic, and seek guidance if needed. I see it as an opportunity to learn.

---

## Final Interview Tip for You

Since you:

- Are organized
- Have internship experience
- Already built multiple projects

You should not answer like a “basic fresher.”

You should answer like a **prepared junior developer**.

---

If you want, I can now:

-  Conduct a live mock HR interview
-  Give startup-specific HR questions
-  Give MNC-level HR questions
-  Provide tricky psychological HR questions

Tell me which one you want next.
